Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

MOBILE APPLICATION

Getting Started Tutorial

There will be a short getting started story board for each registered user type which briefly explains how to use the apps main features.

- Dancers
- Parents
- Fans
- Studios

Registration (COPPA Compliant)

When a person downloads the app, they will be required to complete a 3step registration process before they can use the app. The steps will flow as follows:

Step 1: Identify User Type

We will display a screen that says “This mobile app provides access to the Dance Stars 5678 private network. Please tell us how you intend to use the app?” and the following 4 options will be listed with a radio button allowing the selection of 1 choice:

- Dancer
- Parent or Guardian
- Dance Studio/Teacher/Choreographer Studio/Personal Trainer
- Fan

The text for each of the 4 options will be a link and when clicked a page will be displayed with a summary explanation of ~~the~~ features associated with that user type. So for example, If I clicked Dancer it will give me a page explaining what functionality I get as a dancer with a back button at the top left corner so I can return to the page with the 4 options listed.

Step 2: Terms and Conditions & Payment

This page will have the terms and conditions on the top of the page and payment information on the bottom of the page.

At the top a large scrollable area containing the terms and conditions. At the top right there will be a printer icon allowing them to send the agreement to print, and a download icon that allows them to download a pdf version of the terms and conditions. Below the scrollable area, will be the following checkbox: ☐ I Accept the Terms &Conditions.&Conditions.

We will display the payment details for the user type they have selected.

We will present the following fields: Referral Code

Payment will be processed via PayPal

Comment [BM1]: we can create a page which have this on the Screen itself so if user want to read T&C with in the app.---

YES

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Step 3: Collection of Information

The information and process will vary for each user type.

Dancer The first question asked, with no other fields visible on page will be: Please tell us your birthdate. When they enter their birthdate-we will calculate their age as of <today>.

Comment [BM2]: Here we need to can use Email id as username of Dancer for login and should verify the email address so that Spam email can stop.

If they are under 13, we will not save the date of birth they provide.

We will ask them to create a password, then they will confirm their password

If they are under 13 years of age, we will tell them the following:

“Thank you for choosing to participate in the Dance Stars 5678 private social network. In order to comply with the [Children's Online Privacy Protection Act of 1998, 15 U.S.C. 6501–6505](#) your parents need to complete your registration. Please tell us your parents email address or cell phone number so we can send them a link to complete your registration.”

Using the email address OR cell phone number provided by the child, we will send their parent/guardian a link to complete registration on behalf of the child.

Need to allow child to have a username that is not their email address because some children do not have email addresses at the age they will begin participating in DanceStar5678 social network.

If they are 13 or older we will collect the following information

First Name, Last Name
Email Address
Country, State, City -(each will be a listbox containing valid responses)
Gender
Date of Birth
Profile Image
Username (Default will be the email address if any)
Password
Confirm Password

Do you dance on a school or recreational league dance team? If “Y”, we collect: School/league Name, City, and State.
Emergency Contact (Full Name, Relationship, Telephone#)

Do you attend a Dance Studio (Y/N)? If “Y”, we ~~will~~ collect: Studio Name, City, and State.

Formatted: Indent: Left: 0", Space After: 0 pt, Line spacing: single

Comment [AB3]: We can ask Studio code also ? and once user fill code, studio profile appear ?

Ok don't want here.

Parent or ~~if the user selected Parent or Guardian in Step 1, we will collect the following~~

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Guardian

information:

First Name, Last Name

Email Address

Country, State, City (each will be a listbox containing valid responses)

Relationship (Mother, Father, Guardian, Grandparent, Aunt, Uncle, Sister, Brother, Cousin)

Profile Image

Please tell us about each of your children: (Press "+" to add additional children)

- First Name, Last Name

- Email Address

- Country, State, City (each will be a listbox containing valid responses)

- Gender

- Date of Birth

Comment [BM4]: Here we need to can use Email id as username of Dancer for login and should verify the email address so that Spam email can stop.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Parent or Guardian

If the user selected Parent or Guardian in Step 1, we will collect the following information:

- First Studio/Trainer Name, Last Name
- Email Street Address
- Country, State, City (each will be a listbox containing valid responses)
- Relationship (Mother, Father, Guardian, Grandparent, Aunt, Uncle, Sister, Brother, Cousin)
- Profile Image

Please tell us about each of your Dancers: (Press "+" to add additional children)

- State, City, Zip Code
- Cell Phone Number
- First Name, Last Name
- Email Address
- Country, State, City (each will be a listbox containing valid responses)
- Gender
- Date of Birth
- Send Notification to Dancer (Y/N). If "Y" we collect username and password
- Website Address
- How Many Dancers do you train monthly?
-

Fan

If the user selected Fan in Step 1, we will use the same process that we did for a Dancer because if they are under 13 their parents will be required to complete their registration but we will not ask them if they attend a dance studio.

If parent says "Y" to send notification, when the parent or guardian completes their registration each of their Dancers will receive an email notification about the DanceStar5678 private social network (if they have an email address) showing their username and password with a link to download the app (already pre-registered by their parent). The dancer will be able to log right in instead of completing the registration process themselves.

Studio

If the user selected Studio/Personal Trainer in Step 1, we will collect the following information:

- Studio/Trainer Name
- Street Address
- State, City, Zip Code
- Cell Phone Number
- Email Address
- Website Address
- How Many Dancers do you train monthly?

Fan

If the user selected Fan in Step 1, we will use the same process for a Dancer because if they are under 13 their parents will be required to complete their registration but we will not ask them if they attend a dance studio.

Comment [BM5]: Here we need to can use Email id as username of Dancer for login and should verify the email address so that Spam email can stop.

Formatted: Normal, Space After: 0 pt, Line spacing: single, No bullets or numbering

Formatted: Space After: 0 pt, Line spacing: single, Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Formatted: List Paragraph, Space After: 0 pt, Line spacing: single, Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Comment [BM6]: Here we need to can use Email id as username of Dancer for login and should verify the email address so that Spam email can stop.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Login

User will have the option of creating a new account and entering their details OR they can login using their existing Facebook, Google, or Twitter accounts.

In addition, there will be a [Forgot Password](#) Link near where the user enters in their username and password in-case they are having a problem

Formatted: Not Highlight

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

MOBILE APPLICATION

Dancer Functionality

This is the functionality that will appear for the user who has registered as a Dancer.

The landing page will have notification icons across the top right side of the screen, a side menu icon on the top left side of screen, and a main menu.

Notifications

Notification icons appearing at the top of the page will be: , , and .

When a Dancer has a new notification, a red bubble will appear on the respective icon with the number of new notifications received. There are separate notifications for friend requests , messages , and the rest will appear over the  bell icon. Click these icons at any time to view your notifications. Some examples of notifications are:

1.  New Fan request
2.  Studio sends a message or posts an event
3.  Fan like or comment on a post
4.  Star updates profile picture
5.  Star posts something on their timeline

Main menu and Side menu look and feel

The

Main menu will contain the following ~~options:~~options:

- My Stage
- Dance Star Posts (# unread)
- Library
- Challenges (# new)
- Notifications
- {Studio Name}
 - Studio ~~StaffCrew~~ Profiles
 - Messages
 - Calendar
 - Library
 - Event Registration
 - Billing & Payment

My Stage = this is the equivalent of the Facebook "Wall". This is where the dancer posts their status, ~~pictures,pictures,~~ videos, etc.. for viewing and comment and likes, etc.. by their fans.

Formatted: Heading 3

Comment [AB7]: There should be Notification icon as well?

YES there will be notification.

Comment [BM8]: What will be the Size and format of Videos and pictures? Any limitation required?

Youtube, vimeo, video upload. no limit for picture.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Star Posts = This is where the user goes to view, comment, like, etc.. the posts of the dancer stars they are fans of. Once a fan comments on a post, they will receive notification of any further comments on that post.-fans of.

Library = this is content provided by the Dance Stars 5678 Admin

Challenges = these are contests created by the DanceStars5678 Admin

{Studio Name} = there will be an entry like this for each studio that a person belongs to and it will provide access to all the information associated with that particular studio.

Notification: Notifications that appear above , , and .

When Dancer have a new notification, a red bubble will appear with the number of new notifications you've received. There are separate notifications for friend requests  and messages , and the rest of your notifications will appear over the  bell icon. Click these icons at any time to view your notifications.

1. Someone send friend request
2. Friend like post
3. Friend commented on post
4. Friend update profile picture
5. Friend add something on his timeline
6. Friend like other friend post or comment on it
7. Etc..

Comment [BM9]: Will there is any notification to Dancer when post is like or comment ?

Yes

Will there is another option for Fan such as Happy, love, sad , angry, Woo or Haha?

YES. Emozi library.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Side menu will contain the following options:

- My Profile
- Privacy Settings
- Tell a Friend
- Fans (# total)
- Fan Requests (# of unprocessed fan requests received)
- Studio Connections (# of studios connected)
- About This App → About Us, Terms of Use, Contact Us, Rate Us
- Tutorial
- Logout

My Profile = this is the dancers registration profile, plus their studio related profile

Tell a Friend = facilitates the user telling their Facebook and Twitter friends about the DanceStar5678 private social network.

Privacy Settings = these are the default settings associated with posts

Fans (# total) = This is where the user goes to manage the people they have approved as FANS

Fan Requests (# of unprocessed fan requests received) = this is where the user goes to approve or deny new fan requests and to create, view, and/or delete their own fan requests sent to other Dance Stars.

Studio Connections (# of studios connected) = this is where the user goes to establish a connection with their participating studio.

About This App = This is where the user goes to see content managed by the DanceStar5678 Admin about the app in general. The sub-menu page will have the following options: About Us, Terms of Use, Contact Us, Rate Us

Tutorial = this is a quick storyboard tutorial explaining how to use the app

Logout = this terminates the user session

Comment [BM10]: One Dancer is connected to multiple Studio and able to view all the studio profile?

YES

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Tell-A-Friend

This feature is to allow the user to share our app with their friends via Facebook and Twitter. When a user taps on “Tell A Friend”, they will get a screen that displays a question with two selection options:

“How do you want to Tell Your Friends?”

- Facebook
- Twitter

If the user selects Facebook, a post containing the message below will be **auto composed** and presented to the user with a Proceed or Cancel option. If they cancel they will be presented the message “No problem. You have chosen NOT to Tell A Friend at this time.” If they proceed, the message is published to the users Wall with App Store links (download link) to our app in Apple and Google Play stores:

FACEBOOK MESSAGE: *“I just downloaded a great new app called “Dance Stars 5678” (www.DanceStars5678.com). It is a PRIVATE social network dedicated to young dancers and you have to be invited (referred) by someone who is already a participant. It’s like facebook without the lurkers. My referral code is <Referral Code>.”*

If the user selects Twitter, a post containing the message below will be **auto composed** and presented to the user with a Proceed or Cancel option. If they cancel they will be presented the message “No problem. You have chosen NOT to Tell-A-Friend at this time.” If they proceed, the message is tweeted to their users with App Store links (download link) to our app in Apple and Google Play stores:

TWITTER MESSAGE: *“I just joined the DanceStars5678 private social network (www.dancestars5678.com). It’s like Facebook without the lurkers. #DanceStars5678”*

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Fan Management

In the DanceStars5678 system Friends will always be labeled and referred to as “Fans”. We will use the word “Friend” in this document only to convey the familiar facebook approach to the functionality.

~~On the~~ the main page there will be an option called “FANS”. When clicked the user will get a page with two tabs (Fans, Groups). In the top right corner, below the tabs and above the buttons for assign group and send message there will be a “+” icon to add a friend. When the icon is clicked, the user will be prompted to select Username or QRScan.

QR Scan

If user chooses QR Scan, a scanner window appears. The friend simply selects profile option in the side menu, and user holds the scanner window over the QR code in the profile.

~~At the~~ the time of user registration, System will generate the QR Code of user. This QR code will be displayed in setting. User can post on his wall or share with friends through email. Whenever other user will scan the QR code through application. He will navigate to user profile.

Username

If user selects Username, they will be able to search by username. User must enter the entire username (email address). If found user clicks the record and they will be prompted “Send Friend Request? Y/N”. If user selects Yes, a friend request will be sent, otherwise the user will be returned to the main Pick a Friend page.

Assign Group

User can select one more fans from those listed and click the Assign Group button. This will bring up a screen that allows the user to select an existing group to which all the selected fans will be assigned OR they can create a new group to which all the selected fans will be ~~assigned, assigned~~.

Fans are not able to see that they have been added to a group.

Groups

There will be a tab next to the FANS tab, called GROUPS. When clicked user ~~they~~ will be able to see all the groups that they have already created. IF they click a group, they will be able to see all the fans that have been assigned to that group and they will be able to remove fans from the group at any time.

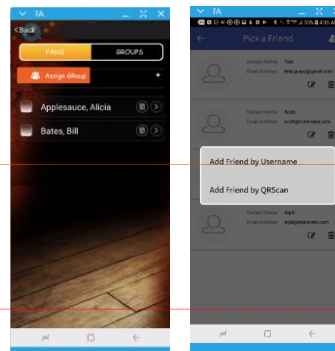

Removing a fan from a group does not de-friend the fan.

Fan Request Management

In the side menu there will be an option called Requests and next to the label there will be a number in a circle which represents the number of outstanding requests that have not been accepted or declined. When Request menu option is clicked, the user will get a screen with two tabs (My Fans, My Requests).

My Fans

This shows all the fan requests that have been received. Each fan will have a checkbox to the left of their name. On the right side there will be an Arrow icon that lets the user see more detail from the

Comment [BM11]: Can you please provide more information? How QR code will be generated and why it's needed here?

It's like FB, scan and profile will be appear.

Formatted: Font: Italic

Comment [BM12]: Can Fan himself remove from the group?

NO, he not.

Comment [AB13]: A dancer, can be FAN also ? One dancer can be fan of other dancer?

YES. He can be.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

users profile so they can determine if they want to accept their fan request. Above the list of fan request records and below the My Fans tab, there will be ACCEPT and DECLINE buttons. User simply selects one or more of the fan requests by placing a check mark in the checkbox next to their name and clicking the accept or decline button. Accept, will make them a Fan. Decline will remove their request as if it was never received. As long as a friend request is present, the same person cannot send another friend request.

My Requests

This tab allows the user to see friend requests that they have sent out. IF user deletes a friend request it is automatically withdrawn from the person it was sent to as if it was never sent.

Privacy Settings

In the side menu there will be an option "Privacy Settings". Here the user can

1. Block specific FANS from commenting/replying to posts.
2. Disable Sharing of content that Stage Owner posts to their stage. Default will be sharable.
3. Default privacy settings for posts

4. Notification Settings

4. Do we need anything else?

Stage Posts & Friends post feed

In the DanceStars5678 system the WALL will always be labeled and referred to as the "Stage". We may occasionally use the word "Wall" in this document only to convey the familiar ~~Facebook~~ approach to the functionality.

This will operate just like facebook. Users will have a Status that they can change anytime and that status gets broadcast to FANS when changed. User can enter text or links and can upload pictures or videos. The User and FANS can comment and reply to comments on the status.

When stage owner makes a post they can change privacy settings on that specific post to any of the following: Only Me, Fans, <groups>

There will be lots of imoji's available to use in place of text comments.

There will be like and share options for every post, unless stage owner has turned off sharing under privacy settings. IF sharing is not turned off, when a Fan clicks share they have the option to share it to their facebook page and it will always have a link back to the www.DanceStars5678.com.

Content Moderation & Reporting

The Stage owner has the ability to delete any comment/reply but they have to identify the reason they are deleting by selecting: Offensive, Negative, Other

- Offensive – when this is selected Admin will receive a copy of the offensive content so it can be reviewed. If admin determines it was offensive, they can increment an offensive post counter for the person who posted it.

Comment [BM14]: Other Settings can be: Who can connect the Dancers?—We don't need this in this version

Message setting on or off— YES, Sure

Notification Settings-- YES

Formatted: Not Highlight

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

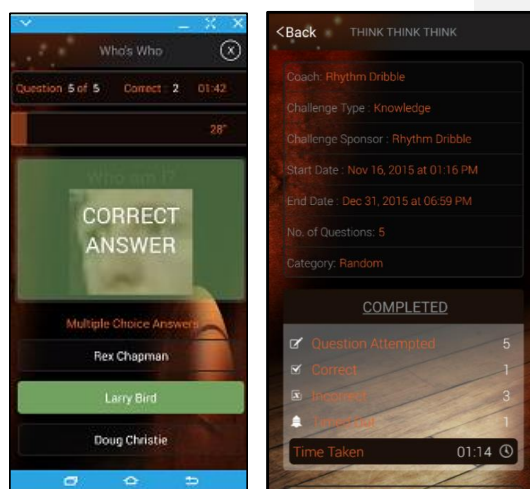

- Negative – when this is selected, the content is just deleted and admin is not made aware and the negative post counter is incremented for the person who posted it.
- Other – when this is selected, the content is just deleted.

Formatted: Indent: Left: 0", Space After: 8 pt, Line spacing: Multiple 1.08 li

Knowledge Challenges

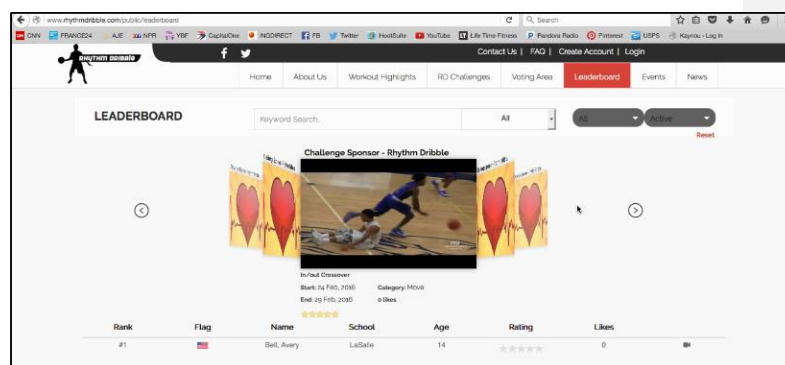

The Admin has ability to create Quizzes that contain 1 to many questions. Each question can include a picture or short video. User has 30 seconds to answer each question. A timer progress bar will appear at the top to show how much time remains for each question. IF they get the question right they are immediately told so, if they get it wrong they are immediately told so and the correct answer is highlighted so they learn the right answer, if they take too long and run out of time they are told so immediately as well. When they finish they see a summary page that tells them about the Quiz and how they did.

All Challenges have Start date and an End date. They are created from Admin site and can be scheduled in advance.

Leaderboards

All participants in the quiz will be ranked and the top 10 will be displayed on the home page leaderboard. Those who answer the most questions correct in the least amount of time are at the top of the leaderboard. The image carousel interface will be used to allow the visitor to move through the various challenges looking at the leaderboard associated with each.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Library

The Library is a knowledgebase where the DanceStars5678 Admin (and Studios) can make various types of information available to the community. Videos, pictures, pdf files, hyperlinks are all posted by creating a document in the library. Documents can be organized into Folders, also created by the Admin (or Studio). Think of each Folder as a room containing information relative to that room. When the user enters the library from the main app screen, they only see information created by the DanceStars5678 Admin. If they enter the library from with Studio option on the main app screen, they will only see information created by their Studio.

Every folder provides a summary of the information contained within including a list of the most viewed documents within the folder and a list of the most recently added documents within the folder.

Every document can be commented on, printed, or emailed to a friend (unless the author has turned off 1 or all of those attributes for that document).

The screenshot displays a web application interface for a 'Knowledge Base'. On the left is a sidebar with a tree view of folders: 'Knowledge base', 'Starting a Business', and 'Business Plan' (which is selected). Under 'Business Plan', there are sub-items like 'Executive Summary', 'Company Description', 'Market Analysis', etc. The main content area is titled 'Business Plan' and includes a search bar at the top. Below the title, it shows 'No of Docs: 10', 'No of Sub-folders: 0', 'Date Created: 09 Sep, 2014', and 'Author: Admin'. A prominent statement reads: 'ALL OF THE INFORMATION CONTAINED IN THIS KNOWLEDGE BASE WAS COMPILED BY THE UNITED STATES SMALL BUSINESS ADMINISTRATION FOR THE BENEFIT OF ENTREPRENEURS AND SMALL BUSINESSES.' Below this, a paragraph explains that a business plan is an essential roadmap. At the bottom, there are two columns: 'Most Viewed Article' and 'Recent Added Article'. The 'Most Viewed Article' column lists 'Executive Summary', 'Company Description', and 'Service or Product L...'. The 'Recent Added Article' column lists 'newarticle_1', 'Marketing and Sales', and 'Appendix'.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Connection

The screenshot displays a web application interface for a 'Knowledge Base'. On the left, a sidebar lists various articles under the 'Business Plan' category, including 'Executive Summary', 'Company Description', 'Market Analysis', 'Organization and Management', 'Service or Product Line', 'Funding Request', 'Financial Projections', 'Appendix', 'Marketing and Sales', and 'newarticle_1'. The main content area shows the 'Business Plan' article, which includes a search bar, a title, a subtitle, and a brief description. Below the article text, there are two columns: 'Most Viewed Article' and 'Recent Added Article', each listing several articles with their titles, dates, and comment counts.

The screenshot shows a mobile application interface for 'Studio Connections'. The top bar has a back arrow and the title 'Studio Connections'. Below the title, there is a section 'Authorize Your Studio(s)' with a text input field for 'Enter Studio's Unique ID' and a 'Validate' button. Below this, there is a section 'Authorized Studio(s)' with a 'De-authorize' button and a list of authorized studios, including 'Arthur Murry Dance Academy' with its 'Studio Unique ID: 548576'. The background of the app is a dark, textured image of a wooden floor.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Connection to Studio(s) (multiple?)

In the side menu, there will be an option called "Studio Connection". To add a studio the user must select Studio Connection and enter their studio's unique ID and press the Validate button. User can add multiple studios. User can terminate their connection to any studio at any time by checking the box next to the studio name and pressing the De-authorize button.

Once a Studio has been authorized, there will be a new option ~~button~~ on the landing page main menu ~~Main screen of the app~~ with the Studio's name. If the user clicks the studio name ~~button~~, they will see the following options: Profiles (studio & crew), Messages, Calendar, Event Registrations, and Library

Messages

This is where all messages received from the Studio will appear organized by date (*most recent at top*) similar to an email file. User can read and delete messages from the studio. They can NOT respond to messages from the studio. ~~This is like email, when all recent mails are on top. And Studio can reply to one of many at same time.~~

Calendar

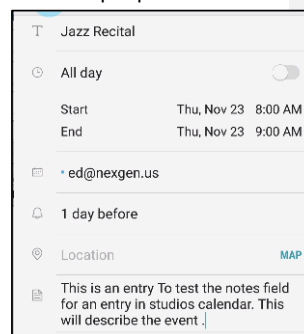

~~This~~ This will be display their studio's calendar. It display ~~the~~ current month. User can look at future months and previous months by sliding the page to the right or the left with their finger. Anytime the

studio makes a change to something on the calendar all the people in the group associated with the calendar entry that was changed will receive a push notification and a message "<Date/Time><Entry title> was changed".

If Dance Star clicks the notification they receive about a new studio event (if they receive one) OR when they visit the studio calendar and click on an event in the calendar, ~~a~~ form opens that displays all the details about the event.

The event details are not editable because they were created and maintained by the studio (or DanceStars5678 Admin).

Comment [AB15]: User can check wall/stage post of studio as well.

Yes they can see.

Formatted: Font: (Default) + Headings (Calibri Light), Bold, Underline

Comment [BM16]: He can reply too?

YES.

Event Registrations

If an event requires registration, the event details form that displays the information about the event (*accessed by clicking the event record in the calendar*) will facilitate the registration and collection of any payment, enforcing all the rules and limitations established by the studio for completion of registration along the way. There will also be a checkbox for "Special need/Disability – Aisle Seat Requested"

Once registration for the event has been completed, a receipt confirming the registration will appear in the Event Registrations section.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Library

This operates exactly as described previously, except this will only display documents and folders that were created by the studio. All features and operations will be the same otherwise.

Billing & Payments

When the user goes to billing & payments, they will see invoices from the Studio. The invoice will have a Pay Now button ([payment via the app](#)) that will facilitate a credit card or electronic check transaction.

The Billing & Payments main screen will be a list view showing: Date, Invoice #, Amount Due. Most recent will appear at the top. If the user selects a record, it will open to show the invoice details and any payments that have been applied, the amount applied, the date/time applied, etc...

~~It's not pre-payment but it can be post payment so we need to track it.
for ex: Abhi join a dance academy and choose monthly package from 5th of month so i need to pay by next month 5th and it will mark due payment section in studio side (with join date and month end date)and once payment done it will be mark in done. AND PAYMENT CAN BE VIA APP TOO. also if it;s due like exceed date 5th then it will be in overdue. Studio will take care of it.~~

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Parent Functionality

This is the functionality that will appear for the user who has registered as a Parent. A Parent is a superset of Dancer. It operates the same as described for Dancer, but it also allows the Parent to see and exercise control over their linked children. The parent can do anything that their child can do and the parent's actions will override those of their child.

The landing page will have notification icons across the top right side of the screen, a side menu icon on the top left side of screen, and a main menu. The notifications icons will operate exactly as described for Dancers.

Main menu and Side menu look and feel

Main menu will contain the following options:

- My Content
 - Profile
 - Stage
 - Dance Star Posts (# unread)
 - Challenges (# new)

- Library

- {Child's Name}

- ~~• Notification: Same as above stated~~

- ~~• {Child's Name}: There will listing of child that are added by the Parent, he can select any one and see the details~~

- Profile
 - Stage
 - Star Posts (# unread)
 - Challenges (# new)
 - {Studio Name}
 - Studio Crew Profiles
 - Messages
 - Calendar
 - Library
 - Event Registrations
 - Billing & Payment

There can be multiple menu entries for {Child's name} and {Studio Name} depending on if the parent has more than 1 child in dance and depending on if the ~~parents child belongs/children belong~~ to more than one studio. When the parent selects a child's name, they see the same menu that their Dancer sees.

Side menu contents will be dependent on the main app page menu option that is selected. If the parent is at the Main app menu or they are looking at "My Content" the side menu applies to the parent. If they have clicked on {Child's Name}, the side menu displayed will be the same as the side menu displayed for the Dancer apply to {Child's Name}. ~~The side menu options are as follows:~~

Comment [BM17]: Parent can switch to child profile (if more than 1 child) after log in and can check start posts, challenges and other action right?

YES. OK.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

- Privacy Settings
- Fans (# total)
- Fan Requests → Fan Requests (#), My Requests
- Studio Connections (# of studios connected)
- About This App → About Us, Terms of Use, Contact Us, Rate Us
- Tutorial
- Logout

FAN Functionality

This is the functionality that will appear for the user who has registered as a Fan. A Fan is a subset of Dancer. The fan has no stage of their own so they are unable to post. They can only participate in commenting on the posts of the Dance Stars they are following.

This is the level of participation that is FREE.

The landing page will have notification icons across the top right side of the screen, a side menu icon on the top left side of screen, and a main menu. The notifications icons will be located and will operate the same as described for Dancer, except there will be no  or , because fans can't have fans and they can't receive messages.

Main menu and Side menu look and feel

Main menu will contain the following options and they will operate as described under Dancer functionality:

- Profile
- Dance Star Posts (# unread)
- Library
- ~~Notification: Same as stated above~~

Side menu options below will operate the same as described under Dancer functionality:

- Tell-A-Friend
- Dance Stars (# total)
- My Fan Requests
- About This App → About Us, Terms of Use, Contact Us, Rate Us
- Tutorial
- Upgrade → Dancer, Parent, Studio
- Logout

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Content Moderation (limited) & Reporting

A Fan can delete any comment that they make, but they cannot delete any comment made by others. They can report the post of others as Offensive, Negative, or Other and this operates the same way as described for Dancer except the post is not deleted.

Upgrade

The user can upgrade their app at any time to Dancer, Parent, or Studio. Each option will take the user to a 1 page informational display with a button to upgrade via PayPal. The user profile will be updated to reflect the date and time and type of their upgrade and it will auto-renew automatically without user notification and with no user interaction required.-

However, they should be able to downgrade back to the free fan level. If they choose this option, they will receive a notification that "All (Parent), (Dancer), or (Studio) content will be permanently deleted and you will not receive a refund for any unused portion of your subscription".

Once upgraded, the selected~~that~~ option will~~should~~ become gray and un-selectable. The initial prices are as follows but will be fully manageable from the DanceStar5678 Admin back-end:

- Dancer = \$2.49 per month
- Parent = \$1.49 per month
- Studio = \$0.99 per year
- Fan = \$0.00 per year

Formatted: Heading 3

Comment [BM18]: Auto renewal required?

YES.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Studio Management Functionality

This is the functionality that will appear for the user who has registered as a Studio. If the menu option is not explained in detail, it operates the same as it has already been described in the Dancer section of this document.

The landing page will have notification icons across the top right side of the screen, a side menu icon on the top left side of screen, and a main menu. The notifications icons will be located and will operate the same as described for Dancer, except  will be used for reminders since Dancers can't reply to messages from the Studio.

Formatted: Normal

Formatted: Font: (Default) +Body (Calibri), 11 pt, Not Bold

Main menu and Side menu look and feel

Main menu will contain the following options:

- Dashboard
- Calendar
- Manage Dancers
- ~~Notification: Same as above stated~~
- Studio Management
 - Attendance
 - Categories
 - Tuition
 - Event Registration
- Social Media Platform
 - My Stage
 - Star Posts (# unread)
 - Messages
- Library → My Library, DanceStar5678 Library

Side menu options below will operate the same as described under Dancer functionality:

- Studio Profile
- Crew Profiles
- Tell-A-Friend
- Pending Dance Stars (# total)
- About This App
 - About Us
 - Terms of Use
 - Contact Us
 - Rate Us
- Upgrade → Training, Billing & Payment
- Logout

Comment [AB19]: Crew profile created by Studio? Crew member can access profile?
Name, description, picture of crew member.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

|

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Studio Profile – this is the registration profile of the studio (not dancers).

Crew Profiles – this is a list view providing access to a short bio and picture on each Studio crew member that will be interacting with DanceStars. Crew member will be added by Studio so Dancers and Parents can see info on each person who works with children at the studio. and Other User can view their bio. Crew member cannot access their profile.

Tell-A-Friend – Operates the same as described for DancerStars and Parents, but the message is different because the Studio needs to share its Unique Id so their dancers can establish a connection within their app.

FACEBOOK MESSAGE: “We have decided to begin using a new product called “Dance Stars 5678” (www.DanceStars5678.com). It is a PRIVATE social network dedicated to young dancers and their parents. It enables me to train, track, and communicate with our dancers/parents more efficiently. It allows you to share pictures and video clips, comment and encourage in a safe environment of exclusively dancer/parent approved “fans”. It’s like Facebook without the fake names and lurkers. My Studio Id is <Studio Unique Id>.”

TWITTER MESSAGE: “I just joined the DanceStars5678 private social network (www.dancestars5678.com). My Studio Id is <Studio Unique Id>. #DanceStars5678”

Pending Dance Stars (# total)total – This page has two tabs: Pending, Active. When a Dancer successfully provides their studios unique id to establish a connection, it generates an approval request to the studio that will appear on the Pending tabs listview. The request can be opened from this view and Accepted or Declined. Upon acceptance, the “Assign Groups” window will popup so that dancer can be added to one or more groups.

If the Studio wants to remove a dancer, they go to the Active tab listview, select the dancer and choose “Disconnect”.

Comment [BM20]: How dancer will get the studio unique id?

Via FB and Twitter , Studio can get code when they register its auto generate.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Configuration- this is where a studio goes to activate and configure (or de-activate) the Training functionality and the billing & payment functionality that are options available to them. When Activated, the system will automatically launch the tutorial for the activated feature and it will create a new Dancer named "Laura DanceStar" with an email address the same as the studio. This will enable the studio to see and play with the training and billing/payment features.

Comment [BM21]: Ability to manage the Tutorials/sessions with their price list?

No need ignore it

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Dashboard

The Studio dashboard will give the studio “At-A-Glance” access to the following information:

Training Category (# of Dancers)

Training Category (# of Dancers)

Training Category (# of Dancers)

Training Category (# of Dancers)

Deliverable #2: Requirements Document

Page 26 of 573

Calendar

Studio will have a Calendar that looks just like it does for a Dancer. The studio owner/manager puts things on the studio calendar by composing an “EVENT”. When the studio creates an event, they will be able to specify the following things:

- Event Name
- Point of Contact
- Telephone #
- Email Address
- Group Notifications
- Event Start Date & Time
- Event End Date & Time
- Event Location
- Event Description
- Registration Required (Y/N)

If they specify any groups in “Group Notifications” a push notification will be sent to the device of all people in the group(s) that was specified. IF no group is specified, no notification about the event will be sent out but it will still be posted in the calendar. There will be a group created by default call “ALL” and everyone who has a connection to the studio is automatically added to the group.

All events do not require registration. The Registration Required default = No. For things like the studio will be CLOSED because of snow or they want everyone to know that a special guest will be coming to the studio (and it will not cost anything extra), the information above is sufficient.

When an event requires registration, the studio can set Registration Required to “Y” and some additional fields will appear which are the rules governing the registration process:

1. ☐ Registration closes on mm/dd/yyyy at hh:mm am/pm
2. ☐ -Registration shall remain open until ____ days before the event
3. ☐ Limit ____ tickets available
4. ☐ Collect Payment at time of registration ____ (per ticket)
5. ☐ Limit ____ tickets per Dance Star
6. ☐ Allow Special Seating and/or Aisle Access
7. ☐ Send Confirmed Registrant List ____ days prior to event

The rules will operate as follows:

1. Stop accepting registrations based on a date/time.
2. Stop accepting registrations a certain number of days before the event
3. Stop accepting registrations when this limit has been reached (all registrations do not require a payment but there may still be a limit to the number of participants).
4. Makes payment at the time of registration required
5. Sets a limit on the number of tickets that 1 Dancer/Parent can purchase
6. When checked, the Danstar/Parent can indicate if they require special seating/location

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

7. A list of the names of those who have registered (along with the date and amount paid) is emailed to the point of contact for the event, at some point prior to the event. If this option is not CHECKED, the attendee list will not be sent to the point of contact prior to the event, but it will still be generated automatically when registration closes and it will be stored under “Event Registrations”. The emailed list is not stored, it is sent as a courtesy.

Event

Event Name

Point of Contact

(+1)-(669) 251-2345

abc@mail.com

Start Date / /

Start Time

End Date / /

End Time

Event Location

Event Description

Group Notification ☒

Registration Required ☒ Yes ☐ No

Event

Registration closes on (mm/dd/yyyy) at hh:mm am/pm

Registration shall remain open until ___ days before the event

Limit ___ tickets available

Collect Payment at time of registration ___ (per ticket)

Limit ___ tickets per Dance Star

Allow Special Seating and/or Aisle Access

Send Confirmed Registrant List ___ days prior to event

Submit

A Confirmed Registrant list is always generated automatically when registration closes and it is stored under “Event Registrations” so that the studio has a list of registered participants on the day of the event.

The format will be:

CONFIRMED REGISTRANT LIST
Event Title:
Event Date/Time:
Total Tickets:
Total \$ Collected:

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Date/Time	Name of Registrant #of Tickets	Amount Paid	Req. Aisle Seat
Date/Time	Name of Registrant #of Tickets	Amount Paid	Req. Aisle Seat
Date/Time	Name of Registrant #of Tickets	Amount Paid	Req. Aisle Seat

The studio can sort by Date/time or Name of registrant.

The buyer may purchase tickets on more than one day, so the system needs to track that they do not exceed the purchase limit for a dancer-star by purchasing in multiple transactions.

The system will track that purchases by a Dance Star and purchases by a parent both count against the limitation per Dance Star. For example, If the limit is 4 and the parent registers the Dance Star and pays for 2 tickets, only two more tickets can be purchased for that Dance Star.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Manage Dancers

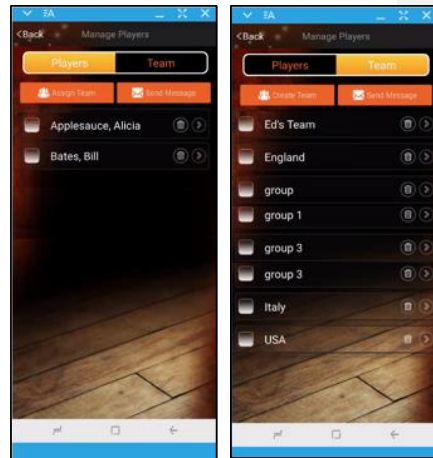

Manage Dancers is where the studio goes to see and manage dancers and the groups they will be assigned too.

There are two tabs at the top of the page:

- Dancers
- Groups

Dancers

The Dancers tab is the default selection when a user arrives at the Manage Dancers page. From this page they can perform the following actions: View Dancers Profile, Assign Group, Send Messages

View Dancers Profile

The dancers profile page, accessible directly on the players tab or through a group to which they are assigned, will allow the studio to see and manage several aspects of their program. The fields preceded by a “!” are managed by the dancer or parent app and can NOT be edited by the studio. Expandable parent section of dancer profile is created automatically when Parent links to their child’s app are established.

Every change to a profile must be reflected in the profile activity log in the following format:

Date, Time, Author, Changed <FieldLabel> from <OldValue> to <NewValue>

The Profile will contain the following data elements:

Dancer Info:

- ! Name (Last name, First name)
- ! Address (Street, State, City, Zip)
- ! Cell Phone
- ! Email Address
- ! Date of Birth
- ! Emergency Contact (Full Name, Relationship, Telephone#)
- Allergies/Medical Issues
- Dominant Hand
- Dance Experience
- Siblings that dance at studio (push button to select dancers from list and add here)
- App Registration Date: (Date they completed their DanceStars5678 app registration)
- Studio Start date (Date they joined the Studio)
- How did you hear about us?

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

[+] Dancers Parents' info will be visible by expanding section

- Relationship
- ! Parents Full Name
- ! Address (Street, State, City, Zip)
- ! Cell Phone
- ! Email Address

[+] Skills Development info will be visible by expanding section

Each training category in which the dancer is participating will be listed and the status of any attribute checkboxes associated with each category will be visible. The studio will be able to add or remove training categories to the Dancers profile, in this section, at any time and update attributes with a check mark at any time. All changes must be reflected in the profile activity log.

[+] Billing History info will be visible by expanding section

This will show the total outstanding balance, Amt > 30 days, Amt > 60 days, Amt > 90 days, date and amount of past payment received, and it will have a listview that shows the following for the last "X" invoices: Invoice Date, Invoice#, Invoice Amt, Outstanding

[+] News – any news on the dancer will be visible by expanding section

This will show any news stories posted to the Dance Stars 5678 website on this specific dancer

Assign Group

To assign 1 or more dancers to a group, the user puts a checkmark in the box to the left of the desired dancers name and clicks the Assign Group button. Next they can either create a new group name or select an existing group name and when they press the SAVE button the selected dancers will be assigned to that group.

Dancers will be assigned to multiple groups.

The System automatically creates the following groups which cannot be deleted:

- ALL – Every Dancer & Parent that have an authorized connection to the studio are automatically added to the ALL group.
- ~~Billing – Billing – this group is created automatically when the Billing & Payment feature is activated (and it is deleted if the feature is de-activated).~~

This group is intended for billing purposes. The studio can add the users who are responsible for receiving and paying the studio's recurring training fees.

Groups

The Groups tab is where the user goes to create new groups, delete existing groups, broadcast messages to a Group, see the individuals who are currently members of a group, add new members to the group, and remove existing members from the group.

Comment [AB22]: Need to discuss more.

Refer page 25

Formatted: Underline

Formatted: Underline

Formatted: Underline

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Studio Management

There are several functions that a studio will be able to manage through the app.

Studio Staff

The studio can create a Staff profile for each person who may be interacting with Dancers. The studio owner (administrator) will have control over rights assigned to staff. However, staff will be able to edit and manage their profile. Profile will consist of: Name, email address, contact number, image, description paragraph, password, access rights (read-only).

Access rights are tied to the Studio main menu options. If the user has the item checked they have access to the menu item, if not checked they do not have access to the menu item:

- ☐ Administrator (all items checked by default)
- ☐ Manage Dancers
- ☐ Manager Calendar
- ☐ Dashboard Access
- ☐ Studio Management
- ☐ Manage Social Media
- ☐ Manage Library

By default, Admin will be checked. An Administrator has the ability to manage the access rights of other users and has access to all the menu options.

When a studio staff member is added, they receive an email invitation notification with credentials and a link so they can download the app and login. The first time they log in they will be required to change their password.

Attendance

In the left navigator there will be a checkbox next to each name. To mark a dancer present ~~or absent~~ (or Un-Do), simply select the student or students in the list on the left by placing a check in the box(es) next to their name and click the PRESENT or ~~ABSENT~~ ~~Un-Do~~ button located on the top right. Once they have been processed, those who have been marked present for the day selected on the calendar will have a small green check mark icon on the right side of their name. ~~Those who were marked absent will have a red X icon on the right side of their name.~~

If the dancer has an outstanding balance their name will appear in red, if they have a zero outstanding balance their name will appear in

The screenshot shows the 'ATTENDANCE' screen of an app. On the left, there is a list of dancers, each with a checkbox. On the right, there is a calendar for November 2015. The calendar has columns for SUN, MON, TUE, WED, THU, FRI, and SAT. The date 17 is highlighted in green. Above the calendar, there is a section for 'Last name: ABCDEFGHIJKLMNOPQRSTUVWXYZ' and buttons for 'PRESENT' and 'UN DO'.

Comment [BM23]: What is outstanding balance?

Outstanding is refer that if you paid 50 \$ and class cost is 100 than ur outstanding is 50 \$.

User can also pay 3 month and or 6 month fees in advance.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

green.

User will be able to filter the dancer names displayed in the left navigator using the following:

The screenshot shows the 'ATTENDANCE' app interface. On the left, there is a list of dancer names, each preceded by a checkbox. The main area features a 'Last name' filter with an alphabet (A-Z) and an '(UN DO)' button. Below the filter, there is a calendar for November 2015. The calendar shows dates from 30 to 27, with the 17th highlighted in green. A small green icon with the word 'PRESENT' is visible next to the calendar.

Alphabet: Studio can click a letter to see all the people with a last name that begins with that letter.

Name Search field: Studio can enter as much of the students name as they know and as they type the letters the names appearing in the left navigator will be updated.

Training Categories– All the training categories (*created and managed under tuition*) will be listed with a checkbox on the left and when a user clicks the checkbox,

only dancers in the category will be listed in the left navigator. The studio can select multiple training categories at a time.

It's important to have an Un-Do button so if a dancer is accidentally marked present or absent, the studio can un-do the mistake and return the dancer status to not processed for the day selected.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Categories

Categories are used to organize, track, and manage Objectives, Curricula, and Tuition. A category can be thought of broadly as a skill level (ex: Intermediate Tap) or narrowly (Beginner Tap Ages 5 - 7).

Classes also allow the studio to track completion of specific objectives as the dancer progresses. For example:

A studio could decide to manage their Ballet Dancers through 3 stages of skills development (Basic, Intermediate, Advance) and each stage might have 5 objectives that the dancer must complete successfully before they can graduate to the next stage. In this example, the 3 stages of skill development would each be a separate class, each with 5 objectives defined. That same studio might also have very young dancers who are simply grouped and managed by age range with no formal objectives.

The studio can create multiple training categories. Each category will have the following data elements associated with it:

- Objective(s) – studio can create 1 or many objectives for each training category. They will appear as checkboxes on the dancers profile in the skills development section so the studio can check off the objectives as they are completed and the dancer can see where they stand when they look at their profile (*but the Dancer can't edit this information*). ~~Studio can add more objective to match their criteria.~~
- Tuition Amount – If zero, no tuition is required for this category
- Discount – allows a studio to specify a discount % for families with multiple kids attending the studio. That % of the Tuition Amount will then be charged to each family member in place of the Tuition amount.
- Billing Period (Per Week, Per Month) (*Only appears if Tuition Amount > \$0.00*)
 - If Per Week: ~~Select~~ If Per Month: ~~Select the day Anniversary or Day of the week~~ Month to generate bill ~~Generate Bill~~
 - If Per Month: Select anniversary or day of month to generate bill

The system will generate an invoice for tuition on the schedule defined by the billing period and it will be sent to the Dance Stars app and stored under Billing & Payment.

Comment [BM24]: Mockup For Listing of categories
Mockup for Add Category and same mockup can be used in edit (see below)

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Tuition

The Tuition page has two tabs. Closed Invoices, Open Invoices

Closed Invoices – this will be a list view with the following columns:

<u>[+] Category name</u>	<u>Attendance</u>	<u>Invoiced Amount</u>
[+] 2016		
[-] 2017		
[+] January		
[+] February		
[-] March		
[+] Category name		
[+] Category name		
[-] Category name		
Joe Blow		
Dane Dow		
Bill Blass		

Open Invoices – this will be a list view with the following columns:

<u>[+] Category name</u>	<u>Attendance</u>	<u>0 – 30 Days</u>	<u>31 – 60 Days</u>	<u>61-90 Days</u>	<u>Over 90 Days</u>	<u>Total</u>
[-] <Category Name #1						
Joe Blow						
Dane Dow						
Bill Blass						
[+] <Category Name #2						
[+] <Category Name #3						

Studio can expand a category to see the invoices for that category. IF they click on the Category name itself (versus the [-] or [+]) it will open a new page (*with a back button in upper left corner*) that displays the Category details: Name, Objectives, Tuition Amount, Billing Period

IF studio clicks the [-] or [+] it will expand to show the names of the dancers who have unpaid invoices

An invoice can be clicked and Studio can apply a payment manually to an invoice.

Comment [AB25]: In objective section we need button when I click on that we can add objective, (criteria).

Add radio button, weekly, monthly and yearly.

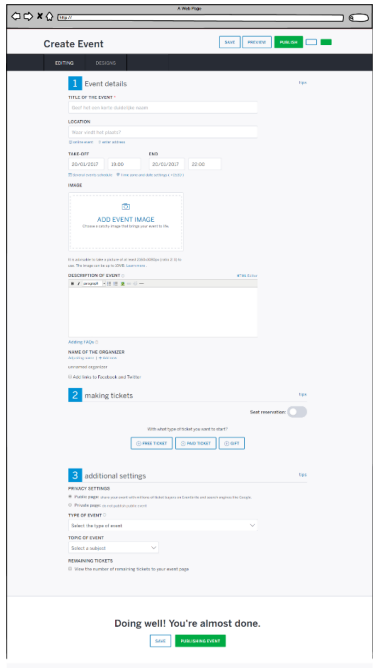

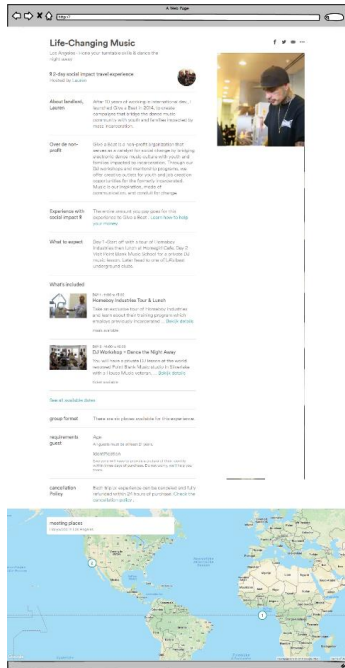

Need to tack join date. Than we track the billed date.

Event Registrations

The Attendee Lists described at the end of Calendar description is stored here. If Payment was not required at registration, the studio user will be able to manually record an amount paid for each person in the attendee list and it will automatically update the total for the overall attendee list.

Comment [BM26]: Event Mockup

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Add Event

If registration is
required Event

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Social Media Platform

My Stage

This operates the same as it does for a Dance Star or a Parent. The studio has their own stage to which they can post pictures, videos, status changes, comments, etc...

When a Studio posts something to their Stage, they are asked if they want to simultaneously post it to their facebook page, which is not the case for Dance Stars or Parents.

Star Posts (#posts)

This operates the same as it does for FANS. The studio is automatically a FAN of every DanceStar with an accepted connection to the studio.

Send Message

The user can select one or more Dancers by placing a checkmark in the box to the left of their name and clicking the Send Message button which will open a window for the user to enter the message they wish to send. There will be a SEND and CANCEL button above the message content field. When user clicks SEND button the message will be sent to the person(s) selected.

Content Moderation (limited) & Reporting

A Studio can delete any Post/comment they make on their own stage and any comment made by others on their stage. They can also delete any comment that they may on a Dance Stars stage. However, they can only report comments made on a Dance Stars stage as Offensive, Negative, or Other and this operates the same way as described for Dancer except the post is not deleted.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

WEBSITE

Home Page

Customer will be provided with 3 layout options and/or they can choose to direct us to a website with a layout they would like to use. Customer will provide all images and content. There will be a login option on this page and access to a forgot username or password utility.

About Us

This will be a container to display content about DanceStar 5678.

Contact Us

This will be a form that collects information and routes it to the DanceStar 5678 email address to be provided. The form will collect the following basic info: Name, Email, Feedback

You do not need to be registered to Contact Us.

User Registration

Users will not be able to register on the website, they will be directed to download the app. Registering through the app as a Fan, Parent, Dancer, or Studio gives you the credentials to log into the website. The same login for the app is the log in for the website.

Comment [BM27]: Website is only

Stage& Fan Activity Feed

This will operate exactly as the Wall and News Feed operate on facebook. Every Fan, Dancer, Fan, Parent, and Studio is automatically a FAN of DanceStars-5678.

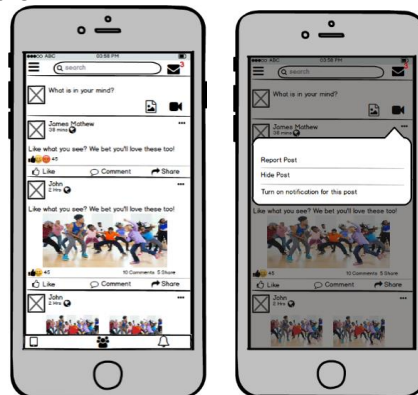

Comment [BM28]: User only activity

You must be registered to see Stage & Fan Activity on the website

Posts to a Dancers Stage will appear in the fans "DanceStar Posts" newsfeed on the main menu (and on the website).

Users can like, post Emojis, comment or share.

NOTE: Customer to identify emoji library

Formatted: Font: Bold, Underline

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Challenge Leaderboards

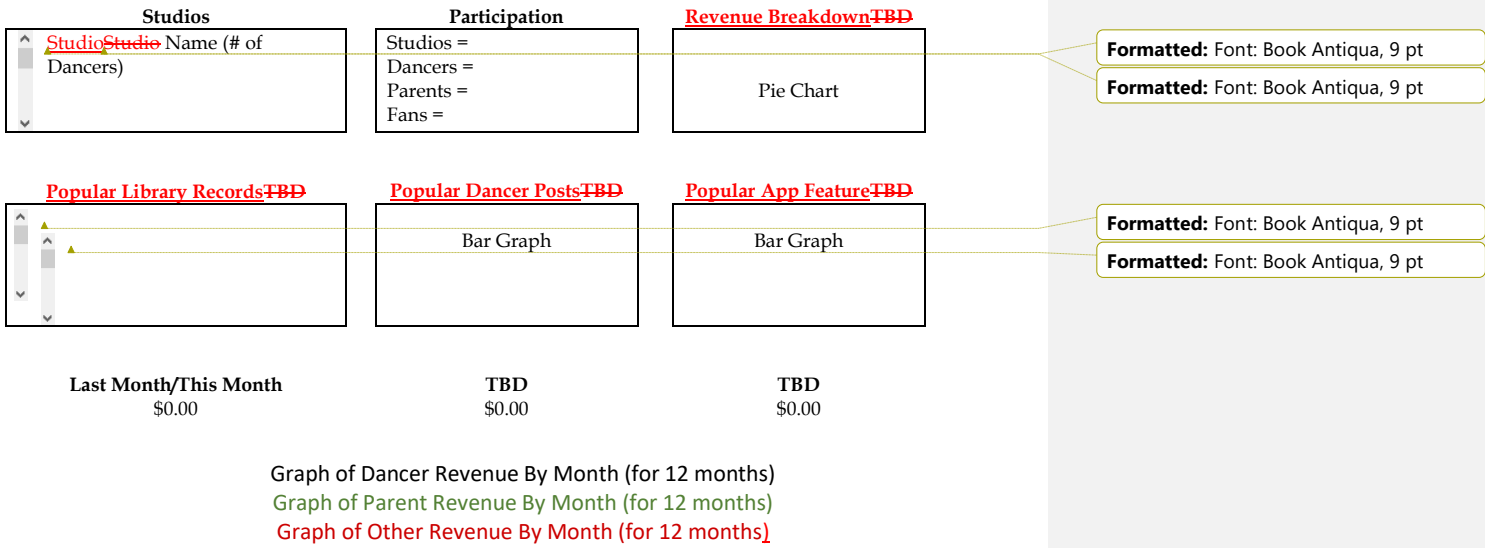

When dancers participate in a challenge, the top “X” performers will appear on the leaderboard for that challenge as defined in the Challenge form by the DanceStars 5678 administrator. If the administrator put a zero in for “X” on the challenge form, there will be no leaderboard for the challenge.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

ADMINISTRATIVE WEBSITE

Dashboard

The dashboard gives the DanceStars5678 Administrator At-A-Glance access to a number of metrics.

Formatted: Font: Book Antiqua, 9 pt

Formatted: Font: Book Antiqua, 9 pt

Formatted: Font: Book Antiqua, 9 pt

Formatted: Font: Book Antiqua, 9 pt

Message Store

All emails and other templates generated or used by the system will be managed centrally from the message store.

Comment [AB29]: All email format provided by your end according to action trigger.

Pre define mail and admin can change wording after.

Website Content

This will be a Content Management system that allows the admin to manage the content being displayed on the DanceStars5678 website.

Events & Registration

The same functionality described for the Studio regarding creation of events.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

News

This section allows the DanceStar5678 Admin user to post News about DanceStar5678, DanceStars5678 and its dancers and participating studios as they are recognized for achievements. ~~It also allows the Dancestars administrator to post and manage podcasts by topic.~~

Library Management

The Library allows DanceStar 5678 Administrator to post articles, videos, files, etc... for view and comment by authorized users. It also allows the Dancestars administrator to post and manage podcasts and other rich content by topic.

Comment [AB30]: Client will update more on it.

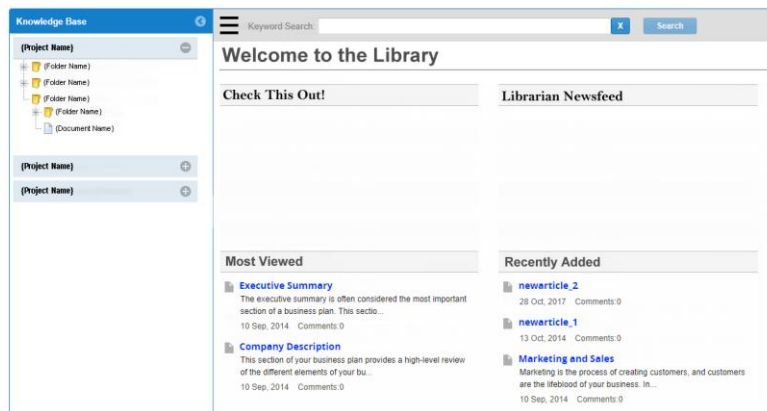

When a user logs in and enters the library, they are immediately delivered to the "Welcome Page" which is the equivalent of the landing or home page for the logged in user. The 3 bars to the left of the search bar are always present (within the library) and a click will return the user to the Welcome Page.

In the images and write-up provided for Library, the label "Project" is a Topic area.

In every project, there should be 1 folder which is the top most folder and all subsequent folders for that project are sub-folders to the top most folder.

I have multiple folders at the top most level in the image to the right, but there can be only one folder at the top most level.

The Search Bar is in this image on the welcome page, but it should not be. Nothing to search from this page. A project folder or record must be selected to see the search bar.

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Directory

This section is also referred to as the left navigator and it collapses vertically (<). When collapsed as it is in the image to follow that describes a “Record”, you just see the name of the product. When expanded, as it is in the previous image, you see the projects and directory structure. A user would only see the Projects and folders and records that they are authorized to see.

Check This Out

When a document is composed, the Author can check a “Notify” checkbox and that tells the system to display the record on the “Check This Out” section of the Welcome Page (if the user is authorized to see the record) and sends them a PUSH Notification if they have the app.

Librarian Newsfeed

This is a listing of the latest items posted that are unread. Once read, they are removed from this list. The newest appear at the top.

Most Viewed

This shows the 5 most viewed documents.

Recently Added

This shows the 5

Visitor Features

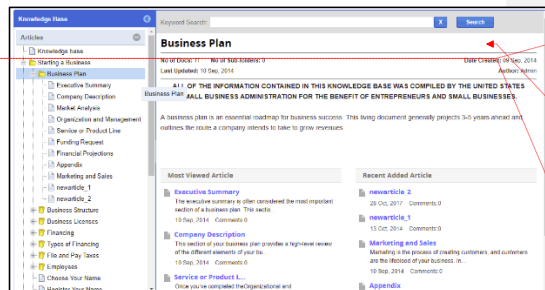

- Access to articles is limited based on access rights defined for each article
- Search for articles using keywords
- Folder level summary of:
 - ⇒ most recently added documents/articles

Comment [AB31]: Add more information on it.

Projects

Projects are the highest level of organizing content (or records). A project is created, then folders are created, then records are placed in the folders. Then groups are assigned to folders/records. Projects inherit their default values from Preferences. When a project is created, the following information must be collected (and inherited as the defaults for any folders or records created within that project):

- Project Name:
- Project Number:
- Date created:
- Author:
- Authorized Groups:

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: Space After: 8 pt, Line spacing: Multiple 1.08 li, No bullets or numbering

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

- ~~Authorized most popular articles~~
- ~~Allowable User~~ Actions:

Folders

Folders are used to organize records

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: List Paragraph, Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Records

A record is the equivalent of a document. Records provide access to content. All records have the following sections:

The screenshot shows a record page with various sections and annotations:

Breadcrumbs

This is the path from home page to selected record

Directory

The directory was described as part of the Welcome Page. It is ever-present in this app because it is used to navigate through the records, organized into folders, organized by Project.

Deliverable #2: Requirements Document

The Librarian interface shows a directory structure:

- Bookmarked Records
- Project Name
 - Starting a Business
 - My Order Testing
 - MY Folder D
 - Tested Article Data
 - MY testing Folder 2
 - newfolder_1
 - newarticle
 - newfolder_1
 - newarticle_2
- Project Name +
- Project Name +

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

of 573

Search Bar

User can enter search terms and as they type the letters the matches are immediately highlighted in yellow within the document

Action bar

These are the actions that the user can take on the document. Defaults are established when the Project and folders are created, but a person with the necessary access can change the available actions when a record is created (or edited).

- Bookmark – Shortcut to a folder or record buried among others
- Share – This is how the records info can be shared, subject to access rules:
 - The options are: Email, Print, Add Comment
 - Share (email, Facebook, Twitter, Skype, Google+)
 - Access rules: This is controlled by privacy settings (Public, Registered, Private)
 - Public – everyone can see without logging into the system
 - Registered – only registered users can see
 - Private – Only DanceStar5678 Admin users can see
- Comment – This allows a person to post a comment on a record. A comment begins a conversation (thread) between 1 or more people. The right to comment is established in the defaults setup for the project/folder (but can be changed for a record when it is created).

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: List Paragraph, Bulleted + Level: 2 + Aligned at: 0.75" + Indent at:

Formatted: Font: (Default) +Body (Calibri), 11 pt

Header

Only the Title and top line of header area are visible to user.

- Title: subject of the record and will be less than 30 characters
- Project #: optional identifier provided by the user (label will not display if field is blank)
- Record Id: unique serial number generated by the system
- Created on: System generated date the record was created
- Updated On: System generated date the record was last updated
- Revision #: Number of times the record was updated
- Authored By: User or Group that created the record

Content RTE

The Rich Text Editor used to manage diverse content. The requirements here are:

- Familiar control of fonts, point size, text color, justification, paragraphs
- Easy uploading, positioning, and sizing images
 - Ability to wrap text around an image
 - Rate articles as helpful or not helpful

Articles

- Unlimited categories (folders) and levels
- Visual Rich text editor for adding / modifying articles
- Built in image upload wizard
- Create tables and set properties like borders and background
- Ability to Embed Video so player shows in content area
- WYSIWYG from RTE interface to published content
- Dynamic Pagination if PDF is generated for printing/saving

Formatted: List Paragraph, Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: Font: (Default) +Body (Calibri), 11 pt

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Assets

Links to download files and/or explore links that are related to the record. If No file attachments are available for the record, the File Attachment area and its label will not be visible. Same applies for the Hyperlinks area.

- File Attachments
- Hyperlinks

Footer

The footer contains statistical metrics about the document and its popularity

- # of Likes
- # of Views
- # of Comments
- Helpful vs Not Helpful

Comments

At the bottom of the record, if commenting was authorized, summary information will appear about the comments on the document:

- Subject: first 35 characters of the comment
- Date and Time of initial comment
- # of replies
- # of views
- Last Post by
- Date & Time
- Priority – Options are: Low Priority, Medium Priority, High Priority, Urgent. Default is Low Priority.
- Commenting Ends – Date after which commenting is no longer allowed. IF blank commenting is not allowed. Default established when Project/Folder setup and options are:
 - o Blank – this means comments are not allowed
 - o Today plus 30 days – on day 31 commenting will no longer be allowed on the record

Title / Thread Starter	Replies / Views	Last Post By
 An example ExtJS application with all accessibility concerns included Started by tempvalue, 28 Jun 2017 2:00 AM	 Replies: 1 Views: 2,141	LesJ 28 Jun 2017, 6:35 AM
 ExtJS / Accessibility Group Started by balogh, 30 Jan 2017 9:22 AM	★★★★★ Replies: 2 Views: 2,412	tempvalue 28 Jun 2017, 1:53 AM

When a Comment summary is clicked it expands to display the detail about that comment and any replies associated with the comment. 1 comment can have an unlimited number of comments

When a comment is added to a record, depending on notification settings of users and the priority settings on the record, everyone should receive a push notification, email, text message, or they will receive no notification but when they visit the Welcome page they will see it listed under Check This Out.

First, thanks Alex for pushing this forum through. Second, I was wondering if there was any interest doing a monthly/quarterly/whatever "round table" covering creating accessible applications with ExtJS. We could discuss: best practices, known issues, workarounds, anything else that anyone comes up with.

Those of us tackling accessibility are all going to face a similar set of challenges. Perhaps by putting our heads together we can save ourselves from reinventing the wheel.

Searching and Results

Searching a Folder will display a search results page that list the records with short summary like google for user to click.

Searching a record will show highlighted words as the letters are typed in the search bar

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

- ~~Secure articles that can be read by:~~
 - ~~Unregistered public users~~
 - ~~Registered Users or Groups (or Training Categories)~~
 - ~~Internal DanceStar 5678 Users or Groups~~
 - ~~Author Only~~
- ~~Display the same article in multiple categories~~
- ~~Add attachments to articles~~
- ~~Add videos (and links to videos) to articles~~

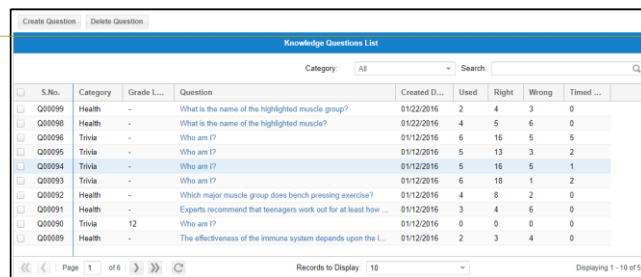

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Challenges

The DanceStar5678 Administrator will be able to create a database of challenge questions. Then they will be able to create challenges (or quizzes) that the dancers can compete to answer. Each question must be answered in 30 seconds or less and the user will see a progress bar as the 30 seconds counts down so they know how much time they have left that question.

Question view

There will be a list view that shows all the questions in the database organized by collapsible/expandable category sections.

S.No.	Category	Grade L.	Question	Created Date	Used	Right	Wrong	Timed
Q00099	Health	-	What is the name of the highlighted muscle group?	01/22/2016	2	4	3	0

Question form

The question form will collect and track a variety of information.

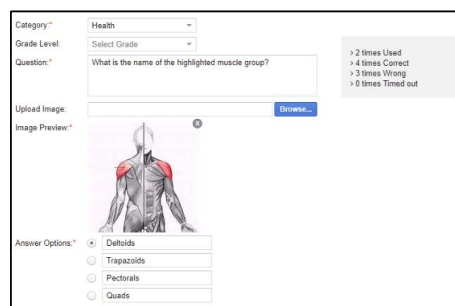

Category - Each question can be added to 1 or more “categories” that are created and maintained by the administrator.

Grade Level – the age or age range that the question is intended for. If no age or range is provided, it is intended for all ages.

Question – this is the actual question that the DanceStar must answer.

Image – this is an optional image that can be provided relative to the question being asked.

Answer Options – these are the multiple choice answer options with the radio button next to the correct answer checked.

Analytics – This tells the admin user:

- how many times the question has been used,
- how many times it was answered correctly,
- how many times it was answered incorrectly,
- how many times the 30 second timer expired before the question was answered

Formatted: Border: Top: (Single solid line, Auto, 0.5 pt Line width)

Challenge Form

This is used by the DanceStar5678 Administrator to create the actual challenge and notify the users who are eligible to participate. It will have the following fields:

Sponsor Name: By default this will be DanceStar 5678

Challenge Name: this is the name assigned to the challenge. ~~It will be~~ **Unique**

Start & End Date: This is the window of time that the challenge is available to be taken by the community

Terms for Participation: This will be a managed from the message store

Number of Questions: This controls how many questions will be randomly selected for the challenge

Category: Questions for a specific challenge can be randomly selected from any question category or just the category(s) selected here.

Grade Level: this is the grade level eligible to participate in the challenge: Any, 1 thru 12

Assign Dancers: This can be ☐ All Dancers ☐ Select Age Range. If Age range is selected a minimum age and maximum age field will appear.

How many winners: Here we identify how many winners will be awarded prizes. The default is 1

Leaderboards: Here we indicate the number of performers who will appear on the leaderboard. The default is 10, meaning the top ten performers will appear on the leaderboard. If this is set to zero there will be no leaderboard for the challenge.

Add Price(s): Here we define what the winner of the challenge will receive. This can be 1 prize or we can list multiple prizes. If multiple prizes are provided, the dancer will select the prize they want if they win from the multiple prices. The fields here will be: Prize name, description, thumbnail image

Deliverable #2: Requirements Document

573

Each type of user is further organized by Status: Active, Suspended, Terminated

Every user will have a user profile and can be assigned to one or more groups:

- User profiles – each user will have a user profile and from the user profile an administrator can perform the following actions: Suspend, Terminate, Email,
- Groups – Users can be assigned to groups. Groups have roles and rights. When a user is added to a group, they inherit the rights of the group. The roles/rights supported by this system will be: Manager, Editor, Author, Reader

Search – search will check the entire user profile for specified keywords

Broadcast – DanceStar 5678 Admin can send an email or push notification to all selected users or just the user whose profile is open on the screen.

Dance Star Posts/ Stage

The Stage will operate like the WALL in Facebook. DanceStar5678 Admin user will have a Stage that belongs to DanceStar5678 which they can post too. Posts to the DancersStar5678 Stage appear in all Fan, Dancer, Parent, Studio, "DanceStar Posts" newsfeed on their main menu (and on the website) unless the Admin user has elected to excluded one or more of the user types.

Users can like, post Emojis, comment or share.

NOTE: Customer to identify emoji libraryBilling

1. Application have pre-payment functionality, there will no option payment due. For example

Studio have added weekly class for \$50 and monthly class for \$249. Let suppose, Dancer have booked class for a week, and done the payment for the same. So there is no option for due payment or outstanding payment.

As we need to do recurring payment in which amount will auto deducted, so whenever the new week start for Dancer, invoice is created and send to Dancer email as well as amount is auto deducted from his account.
